

**EECS 124**  
**GROUP TEAMMATE EVALUATION**

Your Name: \_\_\_\_\_

Please rate the contribution of each of your teammates, and your own, in terms of whether you/they did their FAIR SHARE on the group work. Contribution can take many forms, and may rest on ideas, writing, labor, leadership, etc.

I will consult this form in deciding whether to adjust the group grade up or down for an individual. My rule of thumb is that a negative rating from one individual may be due to a personality conflict, but that two or more negative ratings indicate a problem, with similar conclusions about positive ratings. I will primarily consider your evaluation of your teammates.

For each member of the team, including yourself, assign a percent score that quantifies the relative contribution of his/her efforts (the total should be 100%). Also give a suggested grade increment, where a grade increment is the difference between, for example, a B and a B+. Note that these increments should sum to about 0 – It makes no sense to give everyone a +1, because the superior performance will already be reflected in the group grade. Thus, for a team that worked well together and with full and equal participation, all the increments should be 0.

Explain your reasoning for your score by describing each member's contributions below or on the back.

Name of Teammate	Proportion of Total Project	Suggested Grade Increment (circle one)
1. _____	_____	+2 +1 0 -1 -2
2. _____	_____	+2 +1 0 -1 -2
3. _____	_____	+2 +1 0 -1 -2
4. _____	_____	+2 +1 0 -1 -2
5. _____	_____	+2 +1 0 -1 -2
