# PTIDES

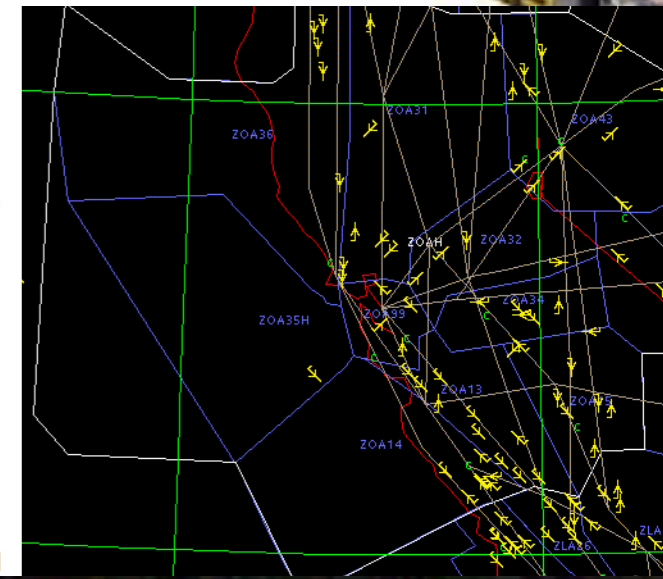

PROGRAMMING TEMPORALLY INTEGRATED  
DISTRIBUTED EVENT SYSTEMS

# CYBER-PHYSICAL SYSTEMS

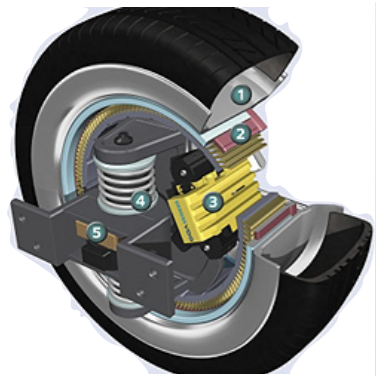

Multiple computers, comprising of sensors and actuators, connected on a network that act and react on events to meet timing constraints.

# CHALLENGES IN MODELING CPS

- Modeling distributed computations
- Modeling time
  - Execution time
  - Reaction time
  - Timing requirements
  - Time synchronization
  - Time on distributed platforms
- Modeling networks

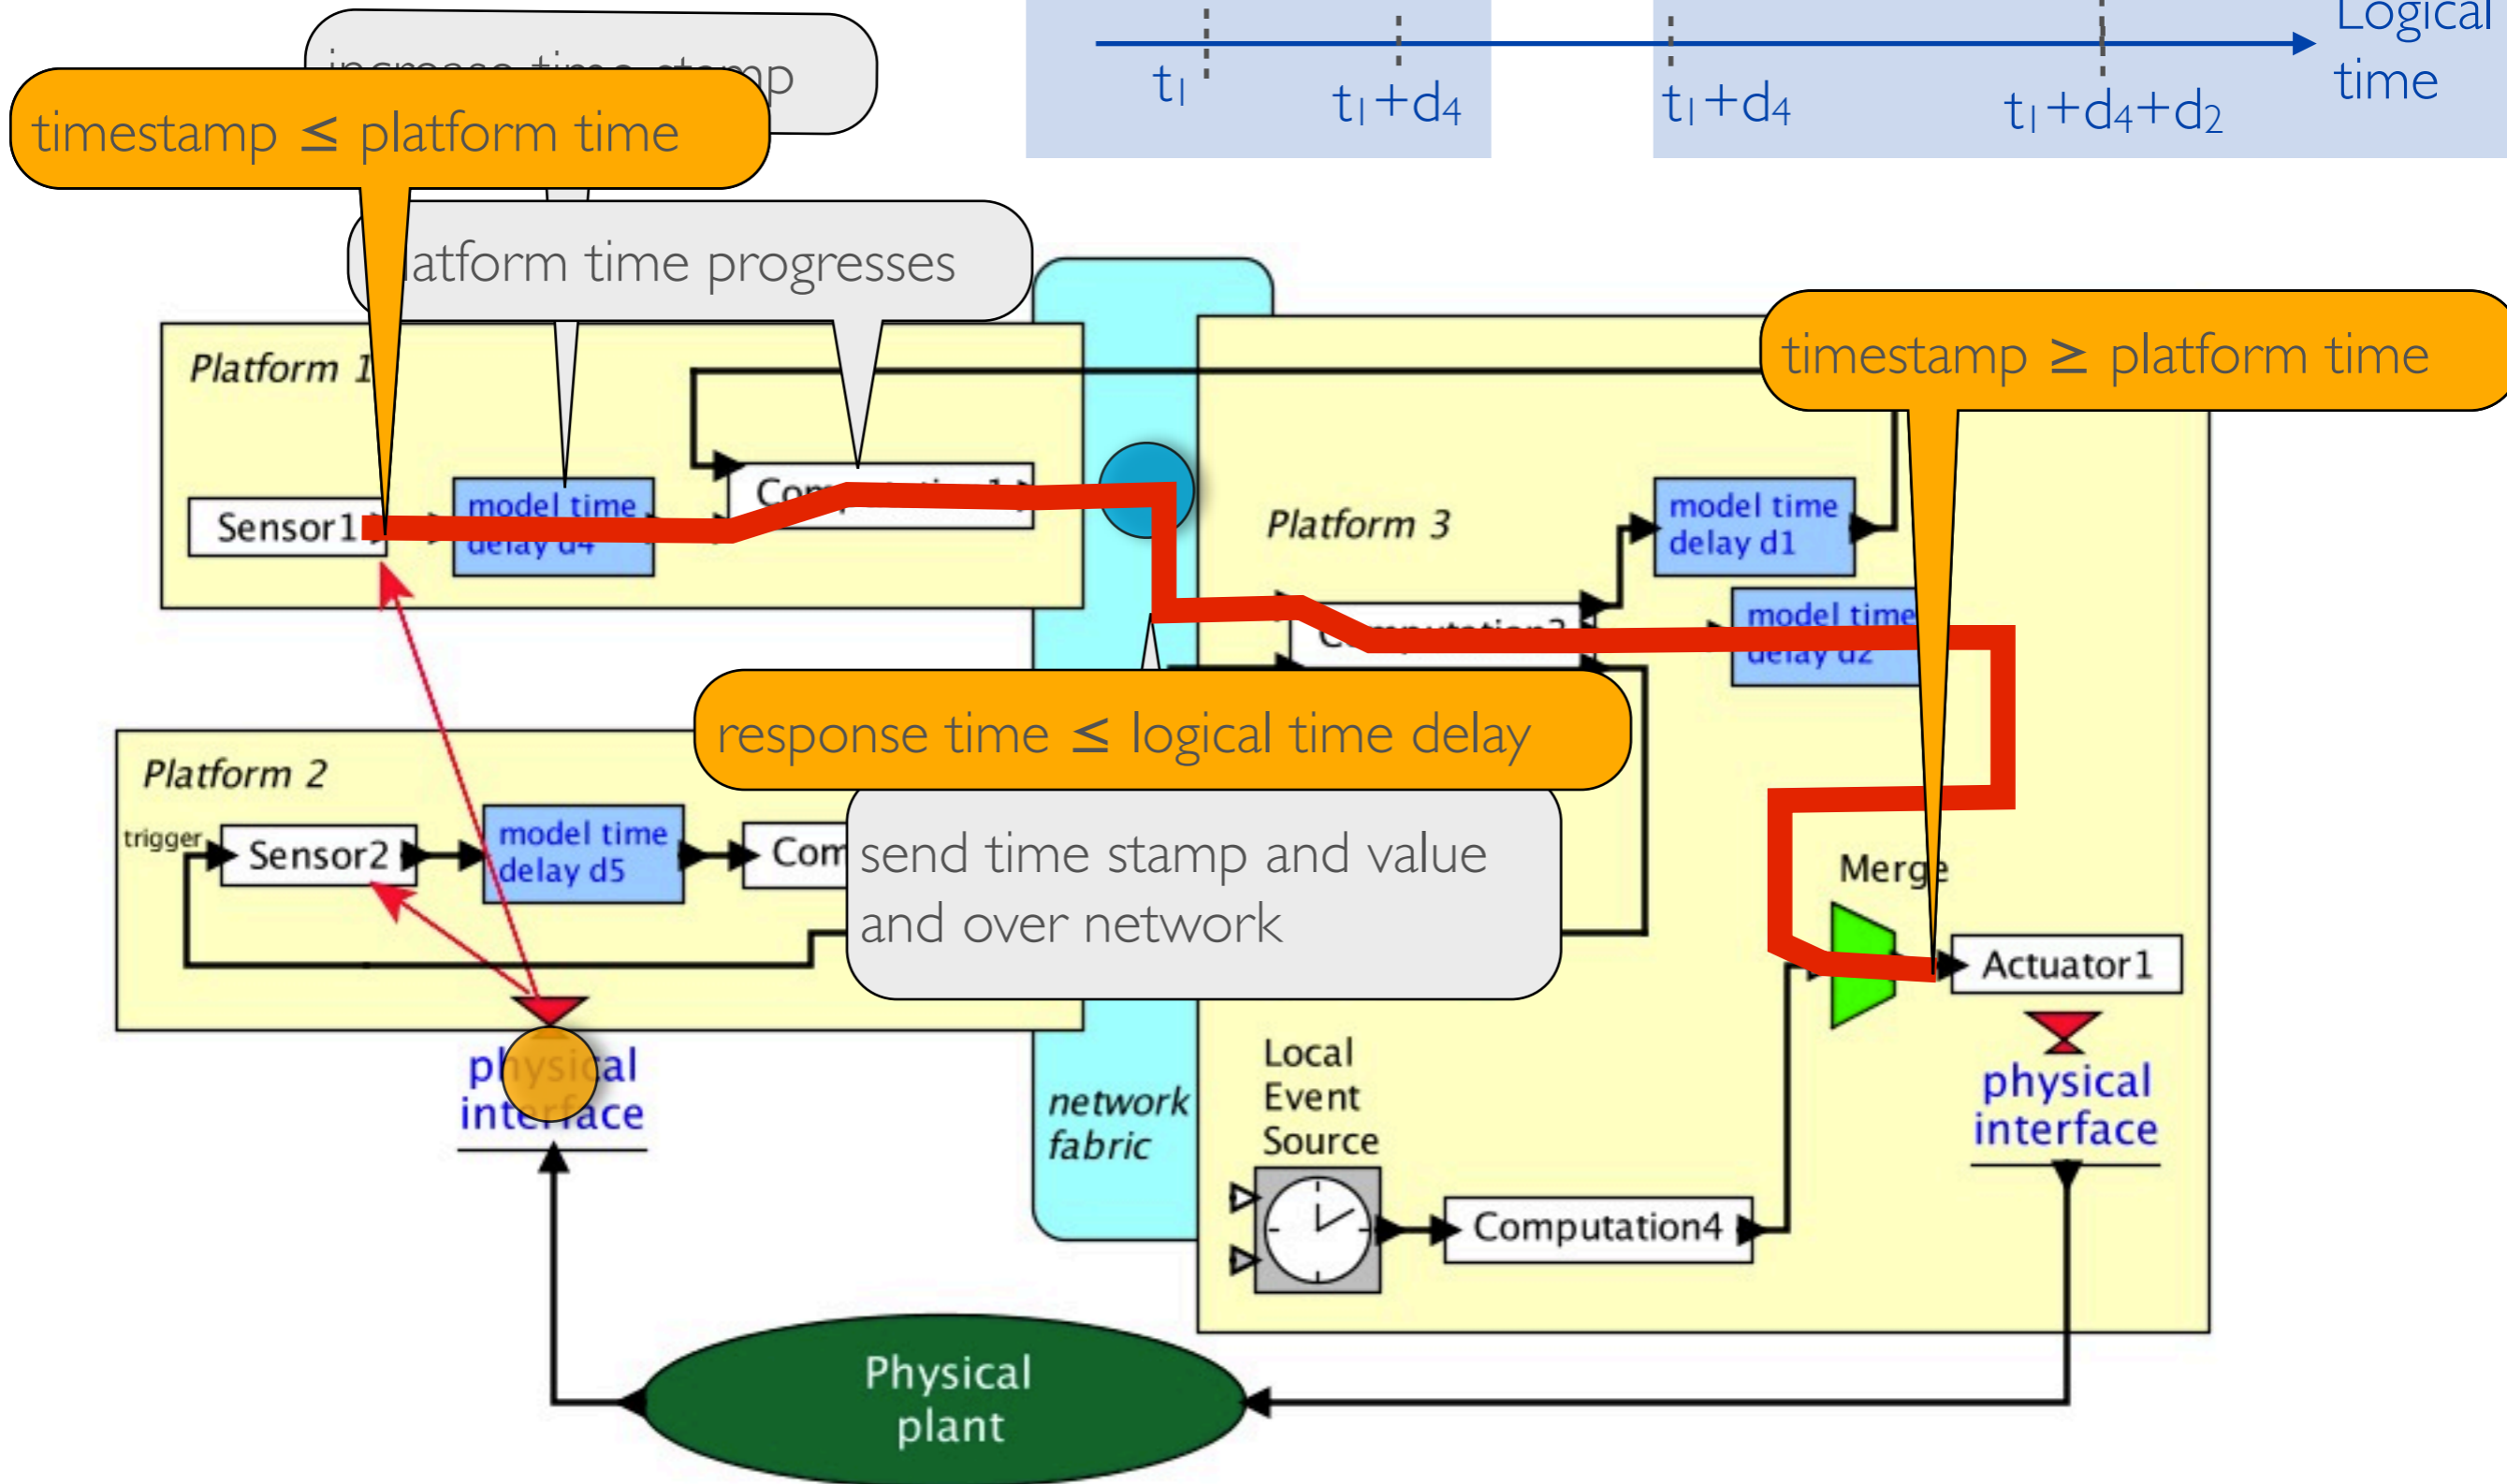

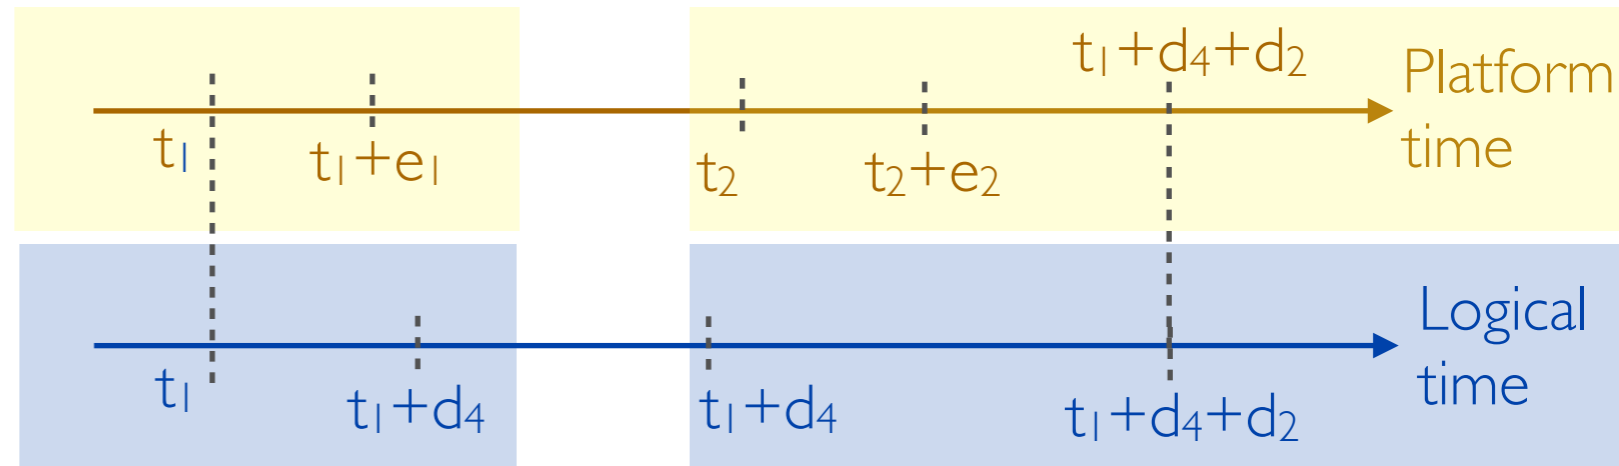

# PTIDES

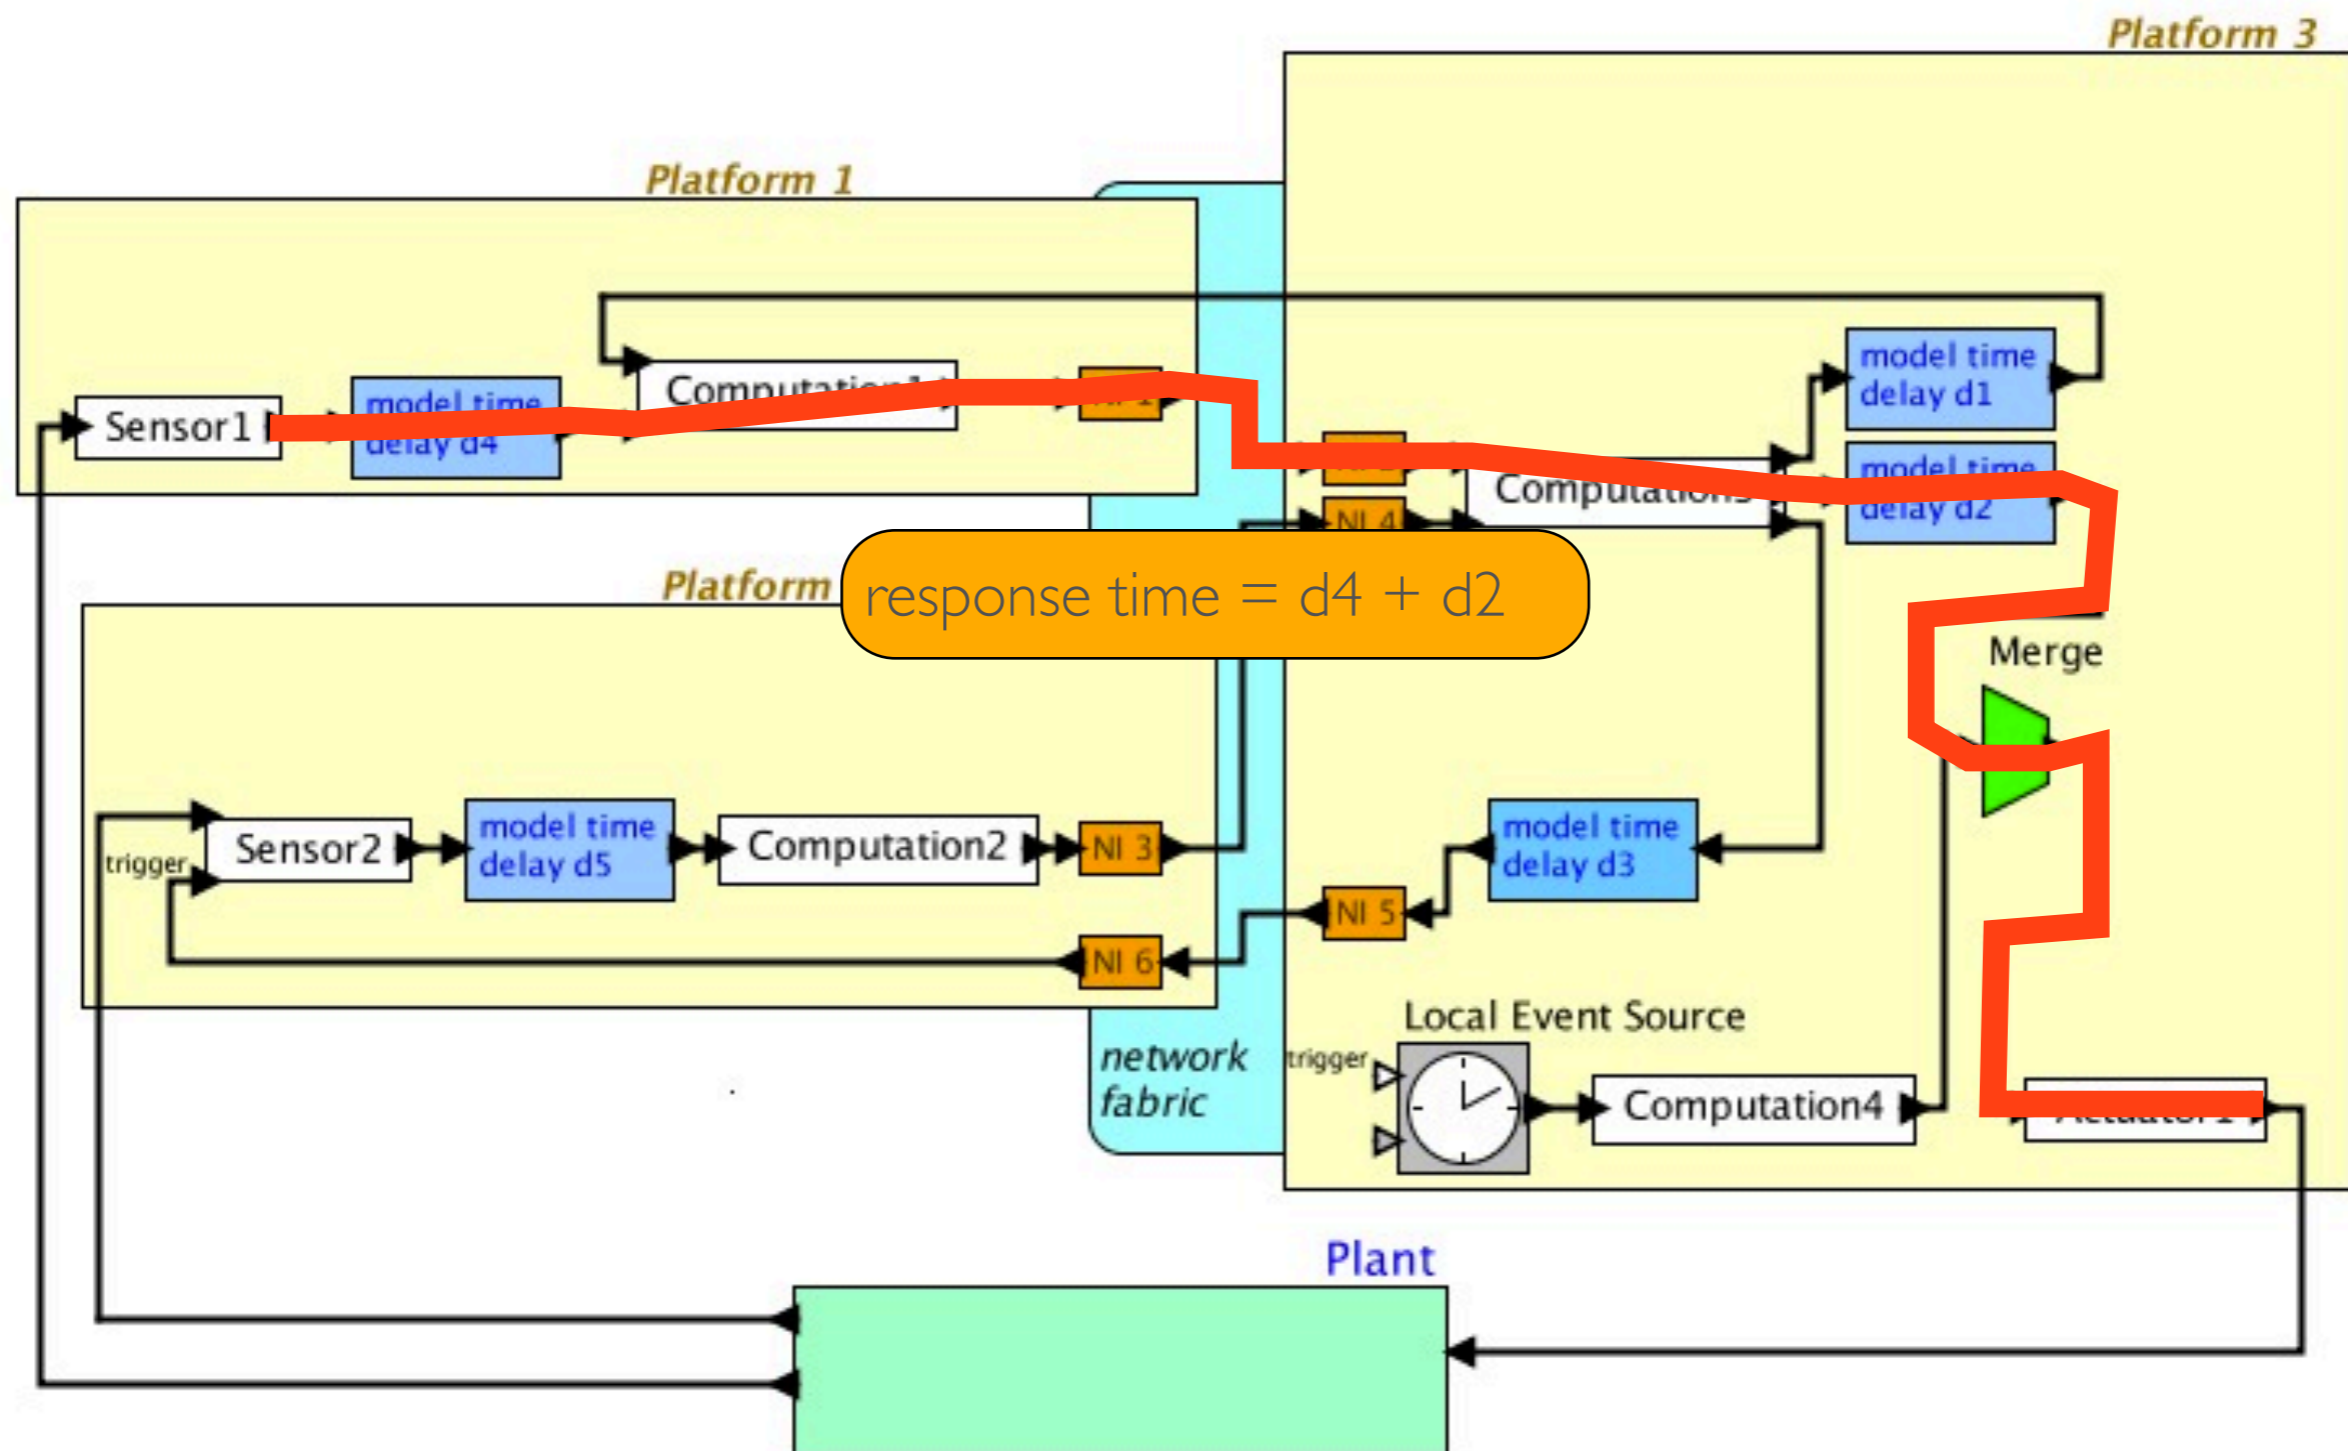

- DE based model of computation
- Model time for model semantics, physical time to explicitly model timing behavior
- Relate physical time to model time at specific points in the model

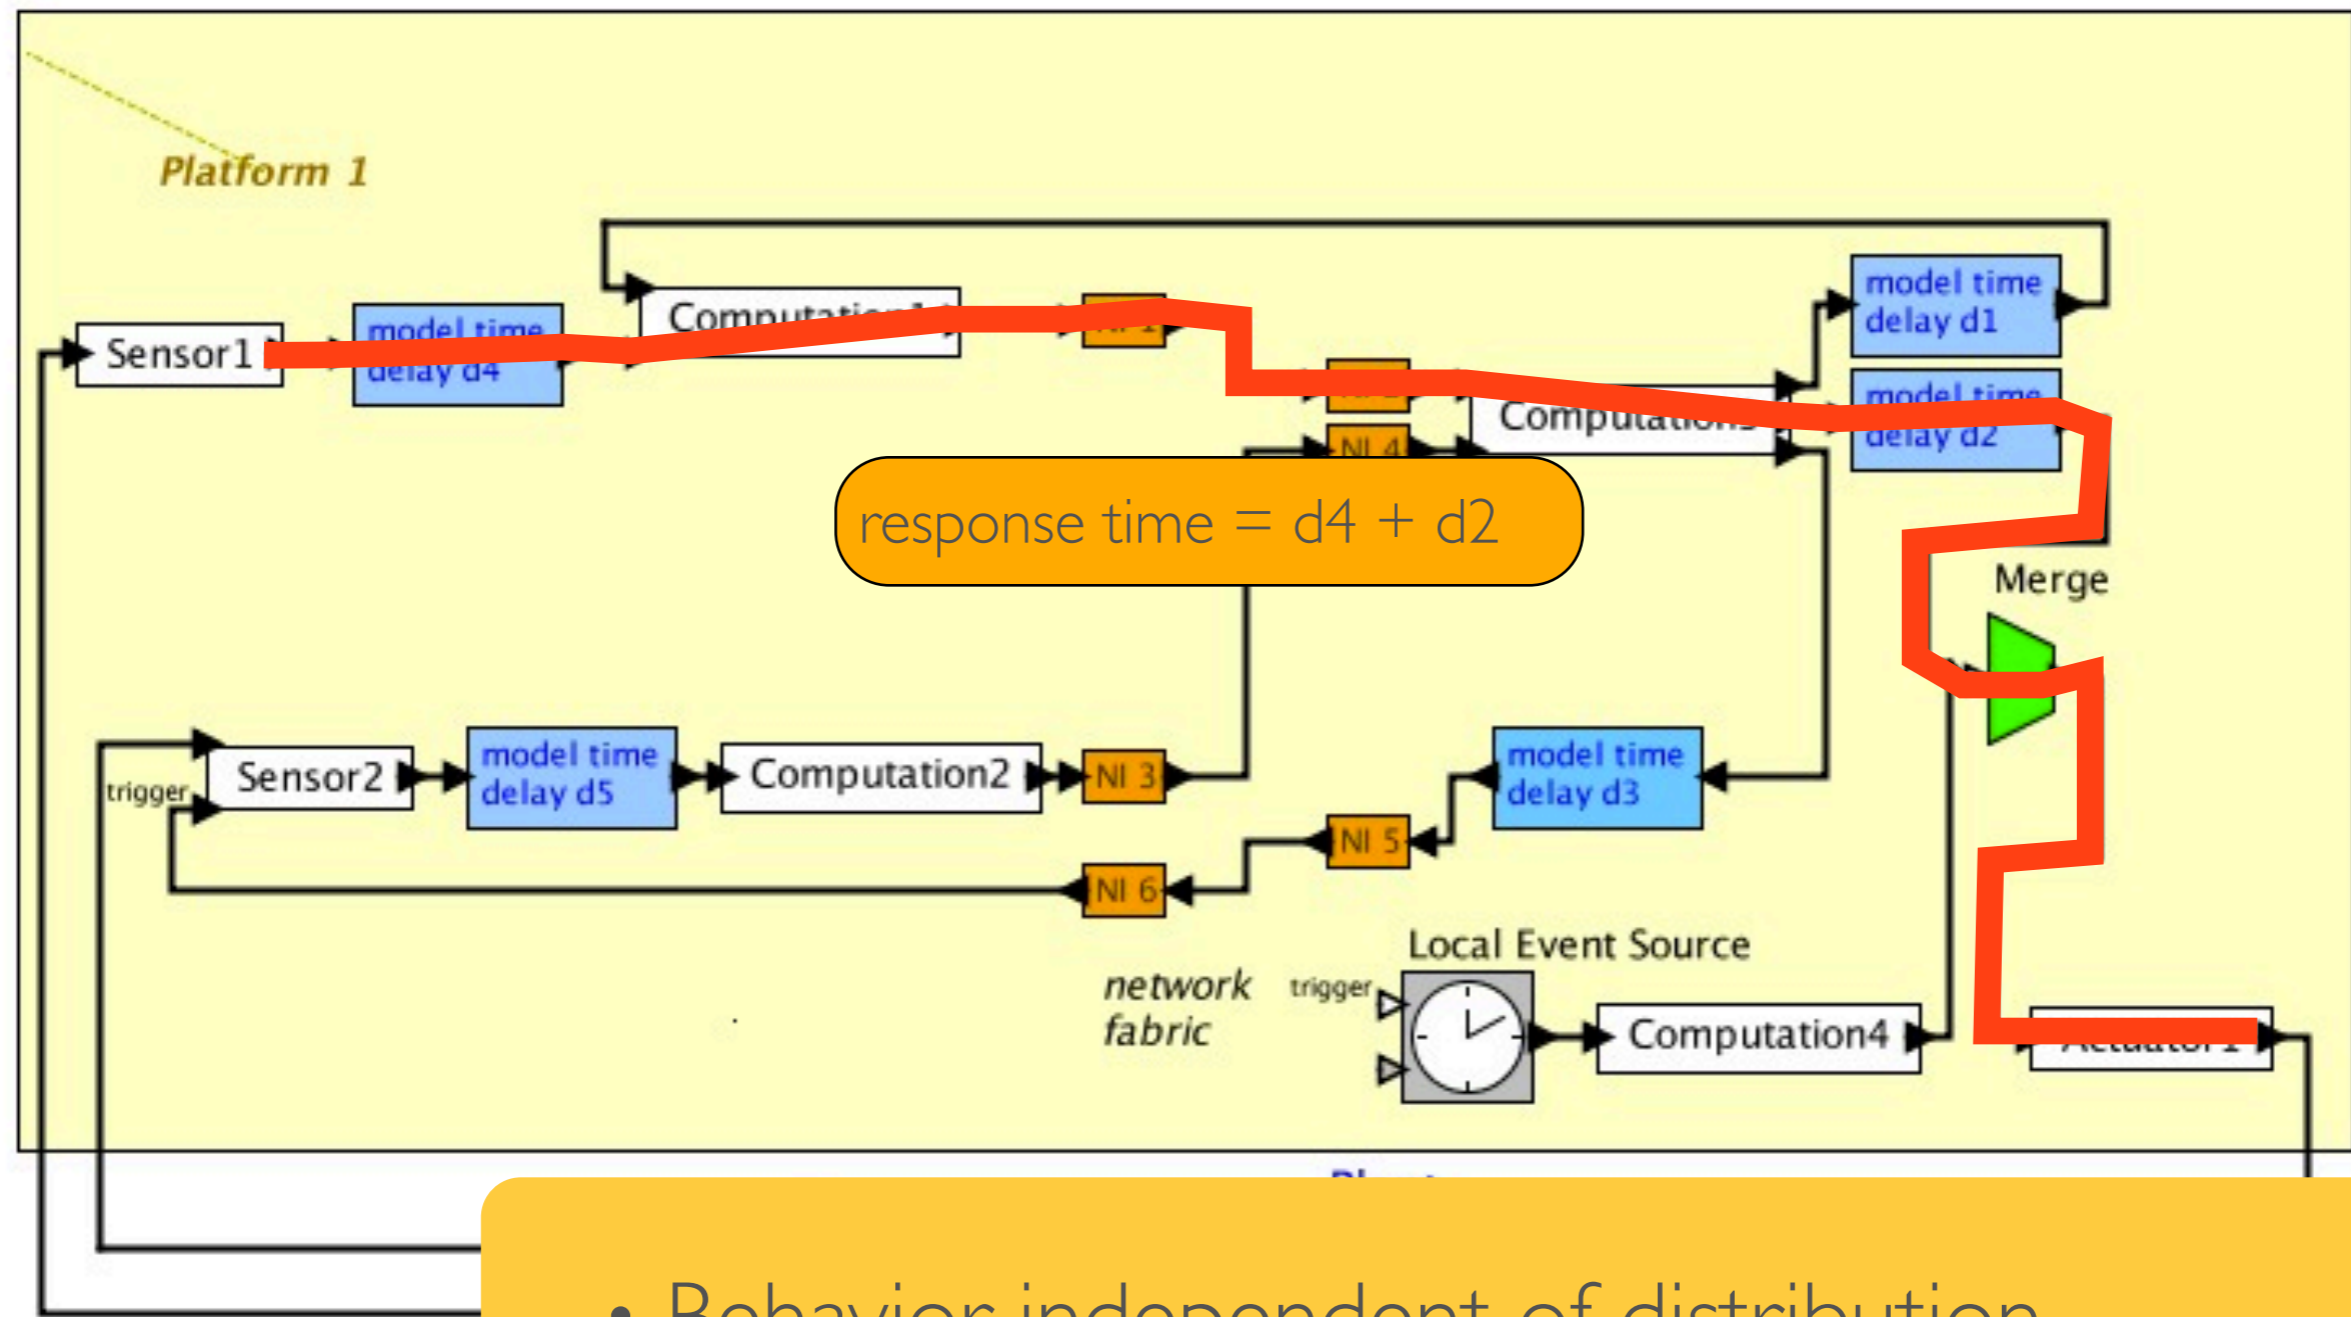

# A PTIDES MODEL
