maximum entropy power spectrum estimation 96
maximum entropy spectral estimation 97
maximum entropy spectrum estimation 96
MDSDF domain 155
MessageParticle class 155
Miller, R. E. 65
multidimensional data 155
multidimensional synchronous dataflow domain .155
multiporthole 160
multiprojection 155
multirate filters 92, 93
multirate signal processing 66

N

noise 69, 101
nonlinear distortion 101
Nyquist frequency 138

O

output_map parameter 148

P

parameter_map parameter 148
parameters 148
PGM format for images 106
phase jitter 101, 103
phase unwrapping 98
pigi 147
polyphase multirate filters 92, 93
power spectrum 96
power spectrum estimation 97, 118
precision of fixed-point parameters 27
precision parameters 27
PRINTER environment variable 61
production of tokens or particles 65
Prolog 183
pseudo-random noise 69
PT_DEBUG environment variable 62, 63
ptcl 147
ptgdb 62, 63
ptinyRpc 63
ptrimRpc 63
pxgraph 73

Q

quadrature amplitude modulation (QAM) 99, 116
quantization 77

R

RaisedCosine (SDF block) 149
rasterized format 155
recursion 157
reflection coefficients 95
repetitions of actors in SDF 66
replacement block 147

S

sample-rate conversion 66
Scripted Runs 126
SDF
    interations 66
second harmonic distortion 101, 103
setup method 147
spectral estimation 97
    autocorrelation method 96
statically evaluated recursion 157
steep Blackman window 118
streams 148
string array parameter 30
string parameter 28, 30
symbolic debugging 62
synchronous signal processing systems 65

T

telephone channel simulation 101, 103
The Math Works, Inc. 89
third 101, 103
third harmonic distortion 101, 103
Toeplitz matrices 88
token 65
twm window manager 184
two-dimensional FFT 156

U

uniform white noise 69
UpSample (SDF block) 66
Utah Raster Toolkit (URT) 106

V

vector processing in the SDF domain 66
Vector Quantization 121
video display 106
visual programming 148

W

where_defined parameter 148
white noise 69, 101
window manager crashes 184
Window System Problems 182

Symbols

.emacs file 184

A

actor 65
adaptive differential pulse code modulation (ADPCM) 103, 119
adaptive equalization
    training sequence 82
additive Gaussian white noise 101
ADPCM (adaptive differential pulse code modulation) 119
all pole filters 94
amplifier 76
array 29
ATM 115, 119
autocorrelation 115

B

balance equations 66
Bartlett 71
Bilung Lee 105
Blackman window 118
blockname parameter 148
bug reports 187
bus 149, 158
bus manipulation stars 147
BusMerge block 147
busses 113
Butterworth filter 91, 138

C

comments in parameters 27
Commutator (SDF block) 66
compact disc 114
computation graph 65
consumption of tokens or particles 65

D

debugging 62
decibels scale 97
decision feedback equalizer 116
DFT (discrete Fourier transform), two dimensional 156
differential pulse code modulation 108
digital audio tape 114
Direct Adaptive Frequency Estimation Technique 94
discrete Fourier transform
    two-dimensional 156
DownSample (SDF block) 66

E

emacs 62, 63, 183
environment variables 61
    PRINTER 61
    PT_DEBUG 62, 63

F

fast Fourier transform (FFT) algorithm 66, 97
feedback
    around quantizer structure 119
FFT
    two dimensional 156
FFT (fast Fourier transform) 66, 97
file input 69, 71
file input for parameters 27
files in parameters 30
FIR 92, 93
FIR (finite impulse response filtering) 95
FIR (SDF block) 66
FIRCx (SDF star) 66
firing of actors or stars 65
fixed-point parameters 27
frequency offset 101, 103
functional programming 147

G

Gaussian white noise 69, 101
gdb debugger 62, 63

H

Hamming window 118
Hanning window 118
higher-order functions 147
histogram 73
HOF Domain 147

I

IIR lattice filters 95
input_map parameter 148
interpolation 66

K

Karp, R. M. 65
Khiar, K. 104

L

lattice filters 95
Levinson-Durbin algorithm 96, 97
linear distortion 101
linear prediction 96, 103
Lisp 147
LMS 94
LMS adaptive filters 103
lmsDualTone (SDF block) 103
loop-SDF 127

M

mapcar function in Lisp 147
Markov 111
Math Works, Inc. 89
Matlab 89
matrix operations in SDF 66
MatrixParticle class 155
